Education

Johns Hopkins University Aug. 2024 – May 2026
Master of Science in Engineering in Computer Science *Baltimore, Maryland*
Relevant Coursework: Software Testing & Debugging, Computer Vision, Cloud Computing Security, Cloud Computing, Object Oriented Software Engineering, Algorithm for Sensor-Based Robotics

National Yang Ming Chiao Tung University (NYCU) Aug. 2019 – June 2023
Bachelor of Science in Computer Science *Hsinchu, Taiwan*
Relevant Coursework: Database Management System, Computer Networks, Computer System Administration, Reinforcement Learning, Deep Learning and Practice, Artificial Intelligence Capstone

WORK EXPERIENCE

Software Developer Intern (Player Personnel) Jan 2026 – May 2026
Baltimore Ravens *Baltimore, Maryland*
- Developed a full-stack scouting application using Ruby on Rails to centralize 40K+ prospects stats and evaluations for the front office.
- Engineered backend data pipelines to integrate the platform with the Ravens' existing SQL Server database.

Software Engineer Intern June 2025 – Aug 2025
Tulane Research Innovation for Arrhythmia Discovery Center *New Orleans, Louisiana*
- Developed medical ECG monitoring platform.
- Developed containerized ML pipeline for ECG data inference with PyTorch.
- Implemented monitoring stack using Prometheus and Grafana.

Artificial Intelligence Engineer Intern Jul 2023 – Jan 2024
Glia Cloud *Taipei, Taiwan*
- Evaluated and presented insights on 15+ emerging open sourced AI models.
- Engineered latent space to enable first-frame image conditioning on text-to-video generation with AnimateDiff.
- Developed automated SQL and Python workflows for data selection and retrieval to eliminated manual DB tasks.

Projects

Baltimore Ravens/RotoWire AI Agent | *vLLM, RAG, AWS* Sep 2025 – Dec 2025
- Achieved full-paper stage invitation to the 2026 MIT Sloan Sports Analytics Conference.
- Collaborated with RotoWire to integrate proprietary player performance data.
- Deployed a cloud pipeline for Retrieval-Augmented Generation system delivering analytics for the NFL teams.
- Deployed a self-hosted LLM using vLLM on an ECS cluster backed by an EC2 Auto Scaling Group.

HopCrave | *JavaScript, Node.js, Express, React, PostgreSQL, Docker* Jan 2025 – June 2025
- Implemented a user-friendly platform enabling recipe creation, sharing, and discovery.
- Integrated GPT API for recipe auto-completion and smart ingredient suggestions.
- Developed a semantic recipe recommendation system using Sentence Transformers to match user preferences.

Asymmetry-Aware Stroke Detection | *Res-Unet, Asymmetry Disentanglement Network* Jan 2022 – Dec 2022
- Improved CT segmentation for acute ischemic stroke by enhancing Res-UNet with asymmetry disentanglement.
- Improved stroke region localization by designing a preprocessing pipeline that removed natural brain asymmetry.
- Increasing precision from 42.6% to 47.8%, DSC from 38.3% to 38.5%, and IoU from 26.4% to 26.9% over baseline.

Technical Skills

Programming: C, C++, Python, SQL, Ruby — **AI/ML**: PyTorch, TensorFlow — **DevOps**: Docker, Kubernetes, AWS — **Systems**: Linux, Git — **Languages**: Mandarin (Native), English (Professional)

Extracurricular Activities

Johns Hopkins Table Tennis Club
NYCU Table Tennis Club
Johns Hopkins TSA Badminton Club
Chiayi City Junior High Table Tennis Champion
